Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/3/2006 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 54 and 58 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has failed to properly define occurrence rate, or explain how it is measured.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

1. Claims 53-60 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The formula of claim 53 has a value of "n" which is never defined, therefore it is unclear when a polymer comprising the same mer unit would satisfy the claim. The claim 57 is independent of claim 53 and therefore indefinite because the formula containing symbol "c" is

Art Unit: 1711

never defined. Claims 57-60 are rejected because “The polymer” of claim 57 and “the pendant fatty group” of claim 58 lack antecedent basis. Finally, the language “occurrence rate” renders claims 54 and 58 indefinite because it is unclear how it relates to the claimed percent values.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 53-60 are rejected under 35 U.S.C. 102(b) as being anticipated by Dochniak ('807). Dochniak teaches a polymer comprising the reaction product of polyisocyanate and an ether amine (Abstract). In particular the ether amine preferably consists of N-isodecyloxypropyl-1,3-diaminopropane, which is taken to share the formula of claim 57 and when reacted with polyisocyanate shares the formula of claim 53 (Col 1 lines 44-60). Patentee uses these polymers as coatings, which are cast and form thin films (Col 13 lines 3-15). Finally, patentee teaches the diamine monomer present in the polymer by an amount of 50 weight %, which is taken to coincide with the claimed range (Col 14 lines 65-68).

Response to Arguments

3. Applicant's arguments with respect to claims 7-12 and 52 have been considered but relevant because they are directed towards canceled claims. Applicant's arguments have been further considered with respect to new claims 53-60, but are moot in view of the new ground(s) of rejection.
